DESIGNER

SEED QUALITY - IT'S IN THE BAG!

If you want your grass to perform to the highest level, it is vital to start with a high quality technical mixture, and in today's marketplace, this is not always easy.

The latest Designer range contains cultivars and mixtures that have been formulated to meet the demands of the modern Turf Manager, using the following performance standards.

- Proven in the UK and European climates, Designer uses the latest cultivars, tested at the BSPB trials at Bingley and in European trialling centres.
- Designer uses top quality seed for very high germination and purity; more seeds, less weeds!
- Designer seed undergoes a comprehensive quality control programme in our state of the art seed testing laboratory to ensure it exceeds industry standards.
- Quality bonus - all Designer Seed is coated with our **HEADSTART® GOLD** non-toxic seed treatment to help ensure that each mixture gets off to the best possible start.

Your key to the successful establishment of all grass areas.

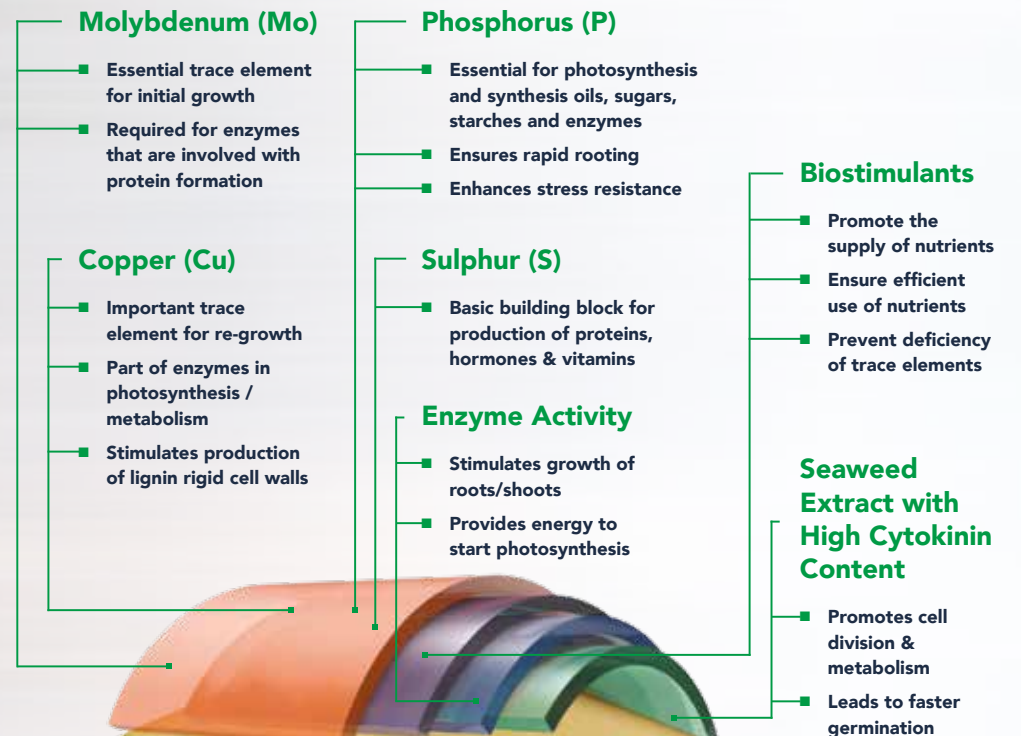

The revolutionary natural grass seed treatment that ensures rapid germination.

HEADSTART® GOLD is the latest in performance-enhancing grass seed coatings for sports fields, golf courses, lawns and amenity turf.

HEADSTART® GOLD is a biological germination accelerator which is the second generation of the original HEADSTART® formula. HEADSTART® GOLD has been further developed and improved in a number of different ways through research, testing and field trials work. HEADSTART® GOLD includes major and micro nutrients which include Phosphorus, Sulphur, Copper and Molybdenum. These nutrients stimulate root formation, development and growth, ensuring that the seedling grass plant develops a strong root system during the critical start-up phase. This leads to better access to moisture and nutrients and makes the grass seedling stronger and more resistant to stress.

In a short time, HEADSTART® GOLD can help you by giving faster germination, creating stronger roots and ultimately, healthier and stronger amenity turf. The improved seed technology of HEADSTART® GOLD works to help improve amenity grass establishment in all situations. This, along with quality Designer seed, gives sports and amenity turf the best possible start.

HEADSTART® GOLD comes as standard on all Designer seed mixtures. Designer seed offers the highest quality seed in germination and purity standards, meeting the high demands and expectations of today's professional grass users.

ACTION REPLAY

Winter Sports and Horse Racing

An excellent mixture to use when renovating winter sports pitches and high wear areas. Action Replay will germinate and establish very quickly, producing a dense, hard-wearing sward.

Benefits & Uses:

- Fast germination
- Hard wearing
- Good disease resistance
- Excellent renovation mixture for football and rugby areas
- Racecourses and gallops

 **SOWING RATE:**
35 - 50g/m²

 **PACK SIZE:**

PREMIER SPORT

Winter Sports and Horse Racing

A superb mixture to use when constructing and renovating football and rugby pitches. Premier Sport will produce a hard wearing sward for all heavy duty sports areas.

Benefits & Uses:

- High wear areas
- Fast germination
- Good disease resistance
- General sports grounds
- Excellent renovation mixture for football and rugby areas

 **SOWING RATE:**
35 - 50g/m²

WICKET RENOVATION

Summer Sports

This mixture contains a blend of fine-leaved, fast to germinate, quick recovering ryegrasses that have good wear tolerance.

Ideal for cricket square overseeding and end of the season renovation.

Benefits & Uses:

- Overseeding
- Cricket square renovation
- Wicket end repair

FINE TEES & FAIRWAYS

Golf Fairways and Roughs

An excellent non-ryegrass tees and fairways mixture that will produce a dense, attractive fine sward that emerges quickly following divotting and recovers rapidly from damage.

Benefits & Uses:

- Non-ryegrass, tees and fairways
- Dense sward
- Fine appearance
- Suitable for sustainable golf management
- Excellent mix for overseeding golf fairways and roughs

UTILITY

Landscape with Ryegrass

This popular general purpose mixture will produce an attractive sward with good wear tolerance but with relatively low maintenance requirements. The inclusion of a low percentage of ryegrass will provide a durable sward that will establish quickly.

Benefits & Uses:

- General landscaping
- Quality lawns
- Fine appearance

 **SOWING RATE:**
35g/m²

 **PACK SIZE:**
10kg and 20kg

 **MOWING HEIGHT:**
20mm

DOT

Landscape with Ryegrass

This mixture conforms to the specifications of the Department of Transport official mixture, for use on roadside verges, embankments and roundabouts.

Benefits & Uses:

- Roadside verges
- Tolerates a wide range of soils
- Meets the official specification for the Department of Transport

EQUIPADDOCK ORIGINAL

Equipaddock Original has been designed as a very flexible grazing and cutting ley ideal for use by horses and ponies.

The combination of three ryegrasses; Timothy, red fescue and smooth stalked meadow grass help form a pasture with a dense sward that is very capable of producing good yields of high quality horse hay.

The 'creeping' natures of the fescue and meadow grasses ensure that this ley will 'repair' itself where heavy treading or close grazing have occurred. This feature also means that Equipaddock Original mixture can be readily used on gallop areas where hard wear and dense cover are essential.

Equipaddock Original is very responsive to moderate use of nitrogen fertiliser that will enhance yields of forage for hay and assist with recovery after cutting.

LG Wildflowers

All LG Wildflower mixtures contain:

- 80% Low Maintenance Mixture
- 20% Native British Wildflowers

Over the past 50 years, the number of traditional wildflower meadows have sadly declined, which has resulted in a noted decrease of British insects.

In order for pollination to take place, we need the perfect flowers to attract those all-important bees, so they can ensure the plants become fertilised and produce seeds and fruit. Limagrain's ten perennial Wild Flower mixtures and the Cornfield Annual Mixture all contain some of the recommended plants on the Royal Horticultural Society's list of plants.

You can read more about the need for bees on the RHS website www.rhs.org.uk.

 **Bumblebee Conservation Trust** The Bumblebee Conservation Trust is the only charity in the UK dedicated solely to the protection of bumblebees. Their expert conservation team support bumblebee friendly habitats, raise awareness and gather scientific evidence about bumblebee populations, to safeguard the future of these iconic insects and vital pollinators. You can read more about their work at www.bumblebeeconservation.org.

Select a weed-free site of low fertility. Fertiliser should not be used, since broad-leaved and grass weeds, together with cultivated grasses contained in standard mixtures, can be highly competitive on fertile soils. This can adversely affect seed germination, establishment and subsequent growth. However, increased grass cutting can help to counteract over-competitive growth.

Control weeds before sowing. Annual weeds may be hoed, buried or killed with a contact herbicide. Perennial weeds should be eradicated by a translocated glyphosate-based herbicide. Cultivate the ground to provide a fine, weed-free seed bed. Firm if necessary. Sow mixtures either from early March to early May, or from early August to mid-September. This will ensure autumn establishment of most species. Take care to sow evenly, at the recommended rate. Thoroughly mixing one part seed with four parts dry sand makes for easy distribution. Rake the seed in lightly with a spring-tined rake and firm the soil by treading or preferably, rolling. This ensures that the seed comes into contact with moisture in the soil. Water with a fine spray. This will avoid disturbing the surface of the soil. Keep the area well-watered and free from any unwanted plants. Cut the sward every six to eight weeks during the first year after sowing and remove the cuttings. This will prevent the grass from over growing the slower growing wildflowers.

In the following years, cut in early spring, before growth starts, and in October, after all wildflower seeds have been shed.

Remove the cuttings.

The LG Flowering lawn mix combines slow growing grasses and low growing wildflowers that create an attractive flowering lawn or grassland area.

80% Low Maintenance

- **Browntop Bent** *Agrostis capillaris*
- **Chewings Fescue** *Festuca rubra commutata*
- **Crested Dogtail** *Cynosurus cristatus*
- **Sheeps Fescue** *Festuca ovina*
- **Slender Creeping Red Fescue** *Festuca rubra litoralis*
- **Smooth Stalked Meadow Grass** *Poa Pratensis*
- **Strong Creeping Red Fescue** *Festuca rubra rubra*

20% Native British Wildflowers

- **Buttercup** *Ranunculus acris*
- **Self Heal** *Prunella vulgaris*
- **Yarrow** *Achillea millefolium*
- **Lady's Bedstraw** *Galium verum*
- **Red Clover** *Trifolium pratense*
- **Cowslip** *Primula veris*
- **Birdsfoot Trefoil** *Lotus corniculatus*
- **Black Medick** *Medicago lupulina*
- **Wild Carrot** *Daucus carota*
- **Wild Basil** *Clinopodium vulgare*
- **Wild Marjoram** *Origanum vulgare*

LG 10 POLLINATORS MIX

The Pollinators mix contains wildflowers and grasses that help create the perfect wildflower meadow and habitat that will attract bees, butterflies and pollinators. This mixture is suitable for a wide range of soils.

80% Low Maintenance

- **Browntop Bent** *Agrostis capillaris*
- **Chewings Fescue** *Festuca rubra commutata*
- **Crested Dogtail** *Cynosurus cristatus*
- **Sheeps Fescue** *Festuca ovina*
- **Slender Creeping Red Fescue** *Festuca rubra litoralis*
- **Smooth Stalked Meadow Grass** *Poa Pratensis*
- **Strong Creeping Red Fescue** *Festuca rubra rubra*

20% Native British Wildflowers

- **Birdsfoot** *Lotus corniculatus*
- **Field Scabious** *Knautia arvensis*
- **Knapweed** *Centaurea nigra*
- **Greater Knapweed** *Centaurea scabiosa*
- **Sainfoin** *Onobrychis vicifolia*
- **Red Clover** *Trifolium pratense*
- **White Clover** *Trifolium repens*
- **Wild Marjoram** *Origanum vulgare*
- **Purple Loosetrife** *Lythrum salicaria*
- **Buttercup** *Ranunculus acris*
- **Kidney Vetch** *Anthyllis vulneraria*
- **Borage** *Borago officinalis*
- **Wild Clary** *Salvia verbenaca*
- **Hedge Bedstraw** *Galium mollugo*

AMENITY FLOWER MIXTURES

 **Bumblebee**
Conservation
Trust
Business Member 2020/21

FESTIVAL

This rich mixture contains varieties such as the Sunbow Zinnia, which provides several waves of flowers.

Festival offers good cover and a source of insects and wildlife. It is an appropriate mixture for dry land, since a lack of water will only tend to limit growth height.

SOWING RATE:
2g/m²

SOWING DATE:
April - June

PACK SIZE:
4kg bag and / or 400g metal can / bag

HEIGHT:
1 - 1.5m

AURORA

Aurora is the general all purpose mixture for all soil types.

Sunbow Zinnia and Trianon Cosmos provide more effective and long-lasting flowering.

This is a medium height mixture, around half a metre tall.

SOWING RATE:
2g/m²

SOWING DATE:
April - June & Sept - Oct

PACK SIZE:
4kg bag and / or 400g metal can / bag

HEIGHT:
0.5m

HONEY BEE

Honey Bee mixture is composed of flowering plants for landscaping, which will attract insects, bees and other pollinators.

It is the perfect mixture for attracting pollinating insects whilst beautifying the countryside.

SOWING RATE:
2g/m²

SOWING DATE:
April - June

PACK SIZE:
4kg bag and / or 400g metal can / bag

HEIGHT:
1 - 1.5m

BIODIVERSITY

This mid-height, strikingly rich mixture was designed to attract butterflies, pollinating insects and in general, small invertebrate or vertebrate fauna.

Predatory insects will find food and water and it will provide food for many vertebrates. The inclusion of lupins in the mixture will enrich soil fertility because they have the ability to 'fix' nitrogen from the atmosphere.

SOWING RATE:
2g/m²

SOWING DATE:
April - June & Sept - Oct

PACK SIZE:
1 or 4kg

HEIGHT:
0.5 - 0.8m

SOWING RATES

Sowing rate conversion chart

All sowing rates in this booklet are expressed in grams per square metre. The following table can be used to convert these rates into units suited to larger areas.

Grams/Square Metres	8	1.5	25	35	50
Kilograms/100 Square Metres	0.8	1.5	2.5	3.5	5
Kilograms/Hectare	80	150	250	350	500
Kilograms/Acre	30	60	100	140	200

PITCH SIZES	DIMENSIONS (m)	AREA (m ²)	20kg BAG REQUIREMENTS SOWN AT		
			20g/m ²	25g/m ²	35g/m ²
Football	100 x 64	6,400	7	8	12
Rugby	100 x 69	6,900	7	7	13
Hockey	91.4 x 55	5,027	6	7	9
Cricket Square	30 x 30	900	1	1.25	1.75
Lawn Tennis	23.8 x 11	262	0.25	0.5	0.5
Bowls	40 x 40	1,600	1.75	2	3
Croquet	32 x 25.5	81	1	1.25	1.5
Golf Green	Average	500	0.5	0.75	1
Golf Tee	Average	350	0.5	0.5	0.75
One Hectare	-	10,000	10	12.5	17.5
One Acre	-	4,047	4.25	5.25	7.25
