QUALITY EQUESTRIAN GRASS MIXTURES

# QUALITY EQUESTRIAN GRASS MIXTURES

## The Equipaddock Range

The Equipaddock range has been developed after consultation with equine nutritionists and seed experts. It offers a comprehensive portfolio of products tailor-made for horses and ponies.

All our mixtures are supplied in handy 10kg bags

## Equipaddock Original

- Equipaddock Original is a flexible grazing or cutting ley, designed specifically for use by horses and ponies
- Forms a very dense, rhizomatous sward suited to hard grazing. It can also produce good yields of high quality horse hay

45% Mid-Season Perennial Ryegrass  
25% Late Perennial Ryegrass  
10% Timothy  
2.5% Smooth Stalked Meadow Grass  
17.5% Creeping Red Fescue  
100%

## Haylage

- A short-term, high yielding mixture for the production of quality haylage
- High in fibre and with a good inclusion rate of Timothy to give a good 'nose'

8% Timothy  
50% Italian Ryegrass  
22% Mid-Season Perennial Ryegrass  
20% Hybrid Ryegrass  
100%

## Equipaddock Gold

- A high quality non-ryegrass long-term mix with high fibre and low sugar content to help avoid dietary issues
- Very dense sward tolerates very close grazing and helps prevent pasture damage. Produce excellent quality hay

12.5% Timothy  
30% Meadow Fescue  
25% Strong Creeping Red Fescue  
10% Sheep's Fescue  
5% Tall Fescue  
15% Smooth Stalked Meadow Grass  
2.5% Bentgrass  
100%

## Horse Hay

- Designed to produce a high quality horse hay with that special 'nose' that can only come from a good Timothy content
- Provides useful grazing in early spring and during late summer & autumn. In winter, graze lightly if a good hay crop is desired

15% Timothy  
5% Cocksfoot  
5% Meadow Fescue  
75% Late Perennial Ryegrass  
100%

## Herb Mixture

- Specifically developed for horses and ponies, this mix includes a number of deep rooting and nutritious species. These provide a good source of minerals and trace elements

35% Chicory  
35% Plantain  
25% Burnet  
5% Yarrow  
100%

Available in 1kg packs. Sow at 250-500g/acre

## Sowing Rates

For complete reseeds, we recommend a sowing rate of 15-20kg per acre and for overseeds or improvements; 10-15kg per acre, depending on how much the sward has deteriorated.
